Stud Service Contract

This agreement is to acknowledge the breeding on _____
between our male Labrador retriever, **SHR Amber Run's Rimfire, AKC#
SR11232202 (Raven)**, to your Labrador retriever female, _____
AKC# _____ owned by _____.

Your female must have one of the following:

OFA Certified hips, PennHIP Certification for hips or a current letter from your veterinarian stating that the hips are radiographically sound. We also suggest that the eyes have been checked and are cleared of Retinal Atrophy. A negative brucellosis test **must be** preformed & presented to Heartland Retrievers before a breeding will take place.

Raven's stud fee is \$500.00. A post-dated check 65 days from the first breeding must be made out to Heartland Retrievers and given to Heartland. Two or more puppies constitute a litter. Once the litter is born, it is the responsibility of the female's owner to fill out the required AKC litter registration form & send to Heartland along with a stamped envelope and payment to the AKC to register the litter. We will then fill out & sign the designated area for the stud dog and send to AKC in order that you receive the puppy "papers" in a timely manner. This can also be accomplished online at www.akc.org.

We pride ourselves on genetically sound Labrador Retrievers and we ask that you are honest when breeding to our stud dog. We wish you success on the breeding of your female. **Please sign & date and return one copy to Heartland Retrievers.**
